MATRIX

Applications overview

Protector

Protector is a revolutionary system which enables a secure storage of weapons, ammunition, patrol units, keys, phones and other items while the access to each item is fully controlled.

Secured storage of valuable items

Determine who has access to each item

Automated documentation of every transaction

Receive alert when item wasn't returned on time

| 1	2	3	4
Identify	**Select item**	**Receive access**	**Documentation**
Biometric / Personal tag	Personal authorization	Only to the requested item	Including video capturing

KeyTag

Secure and manage the access to your properties

KeyTag is a powerful system which enables you full control of your keys. Now you can decide who has access to each key and receive real-time information regarding who took what, when and for which purpose.

KeyTag offers the maximum level of security as each key is secured inside a sealed compartment and every operation is captured by video camera.
